SUMMARY

Graduate student in Data Science and Decisions at UNSW with hands-on experience in data analytics, business intelligence, and machine learning. Proficient in Python, SQL, and Power BI, with a proven record of delivering insights that improved sales, data accuracy, and operational efficiency. Seeking Data Analyst or Business Analyst roles where I can leverage technical expertise and problem-solving skills to drive data-driven decision making and business growth.

PROFESSIONAL EXPERIENCE

Data Analyst & Web Developer Intern Nippon Color

April 2023 - September 2023

- Built Power BI dashboards to monitor daily traffic, conversion funnels, and revenue; insights drove a 12% increase in online sales.
- Redesigned corporate website architecture, improving page-load speed by 30% and reducing bounce rate by 18%, strengthening customer engagement.
- Conducted end-to-end website testing and bug resolution, ensuring a seamless user experience across devices.
- Collaborated with stakeholders across cross-functional teams in sprint meetings to align deliverables, resolve blockers, and accelerate project timelines.

Data Research & Analyst Intern ISchoolConnect Pvt Ltd

December 2021 - June 2022

- Consolidated and standardised 15,000+ university program records using Excel Power Query & SQL, improving data governance and increasing data accuracy by 25%, enhancing reliability of student search results.
 - Spearheaded development of a Flutter-based mobile app prototype with a 4-member team, reducing student program search time by 60% and enhancing user experience.
 - Automated data validation with Python/pandas scripts, cutting manual cleansing efforts by 35% and accelerating reporting cycles.
 - Mentored and trained 4 junior analysts on Excel automation and data-quality best practices, boosting team productivity by 20% and reducing onboarding time.
-

PROJECTS

Beer Portfolio Optimisation

April 2026

Business Analytics Project | UNSW Sydney · INFS5700

- Analysed 11,000 sales transactions across 150 products and 7 regions in Power BI, building a star schema data model with DAX measures for revenue, profit margin, YoY growth, and discount impact.
- Applied BCG matrix classification across the full product portfolio to identify that top-selling products had zero overlap with top-margin products, surfacing a fundamental misalignment in portfolio strategy.
- Discovered that 64% of all discount spend flowed through the lowest-margin channel (Supermarket at 37.3% vs Bar/Restaurant at 45%), quantifying a potential \$80,234 profit improvement through channel reallocation.
- Delivered prescriptive recommendations: promote 14 product-region combinations, reposition 3 misplaced products, and phase out 7 underperformers which was presented as a data-driven narrative across descriptive, diagnostic, predictive, and prescriptive analytics frameworks.

Adaptive Learning and Curriculum Recommendation

April 2024

Final year project

- Developed an interactive learning platform for students and teachers, enabling topic selection, progress tracking, and personalised recommendations.
- Integrated pre- and post-study quizzes for students and a graphical interface for teachers to monitor progress and allocate materials.

Disaster Tweet Classification with Deep Learning

October 2023

Published on IEEE

- Designed an ensemble NLP model combining FastText, BERT, and GloVe embeddings with LSTM to classify disaster-related tweets.
- Achieved high accuracy, precision, recall, and F1-score, improving real-time disaster information filtering.
- Enhanced emergency response workflows by distinguishing relevant disaster tweets from irrelevant chatter.

Air Quality Forecasting with Hybrid Ensemble Learning

September 2023

Published on IEEE

- Built a hybrid ensemble model (STL decomposition + multiple learners) to forecast AQI, PM10, and PM2.5 levels.
- Improved prediction accuracy over traditional models, validated via MAE, RMSE, and R² metrics.
- Provided actionable insights for policymakers and environmental agencies to mitigate air pollution impacts.

Clear Waters: Automated Detection of Plastics in Rivers

June 2023

Hackathon

- Led end-to-end development of a plastic detection platform comprising a Website, Mobile App, and Model Explanation modules, reducing manual river monitoring effort and enabling scalable, automated detection using FastAPI and Dropbox integration.
- Integrated forecasting features into an interactive map to enhance proactive plastic removal based on environmental variables, improving cleanup efficiency.

EDUCATION

Master of Data Science

September 2024 - September 2026

University of New South Wales

Master of Data Science and Decisions | WAM: 75.3/100 | Concentration: Business Data Science.

Bachelor of Technology (Diploma, Degree)

June 2018 - May 2024

NMIMS University

Bachelor of Technology - Computer Engineering (Diploma & Degree) | CGPA: 3.72/4.00 | Concentration: Artificial Intelligence.

TECHNICAL SKILLS

Business Intelligence & Visualisation: Power BI (DAX), Tableau, Excel dashboards, Data Cleaning & EDA.

Programming & Data Analysis: Python (pandas, NumPy, scikit-learn, Seaborn, Matplotlib), SQL (PostgreSQL, MySQL), Excel (advanced, Power Query).

Machine Learning: Regression & Classification, Time-Series Forecasting, NLP, Clustering, Deep Learning (CNN, RNN, LSTM).

Databases: SQL, PostgreSQL, MongoDB.

Tools & Frameworks: Git, Flask, FastAPI, Agile/Scrum, Power Automate, Stakeholder Communication.

ACHIEVEMENTS

- "Shut up and take my money!" award | *Terrible Ideas Hackathon 2025* | *UNSW Founders*.
- 2nd Place in SAAVISHKAR 2024 | *Capstone Project Competition* | *NMIMS University*.
- 1st Prize among 750 teams from 19 countries. | *Plastic-Free Rivers, AI towards Sustainability Hackathon* | *REVA University, Kyndryll*.
- First Runner-up | *College Website Competition*.

ADDITIONAL EXPERIENCE

Volunteer

December 2024 - December 2024

New Year's Eve Volunteer - City of Sydney.

- Supported crowd management for one of Sydney's largest public events, guiding attendees and resolving on-site issues to ensure a safe, positive experience for thousands of visitors.
- Collaborated with event staff and local authorities to maintain safety compliance and smooth event flow.

Waiter

November 2024 - March 2025

Taj Indian Sweets & Restaurant (Part-Time)

- Delivered high-quality customer service in a fast-paced environment, handling 50+ customer interactions per shift with strong communication and efficiency.
- Coordinated with kitchen and service teams to streamline orders, improving table turnover and guest satisfaction.
- Managed payments and POS operations accurately, ensuring smooth daily transactions.

INTERESTS

Motorsports (F1, Rally) Soccer Painting Sketching Video Games.
